

Program Objectives, Measurements, and Outcomes

Explanation of Institutional Assessment Measurements

Northpoint Bible College requires and values assessment to monitor and enhance the effectiveness of individual courses and the curricula at large in support of the institution's mission. An important element of this assessment process is the measurement of objectives at various levels including those of the institution, degree program, and the divisions within each program, and the individual courses. The collected data is limited due to the recent Pandemic. Also, institutional objectives were not matched to assignments, quizzes, and exams until the 2020-2021 academic year. Beginning with the 2020-2021 academic year, the Institution is on a three-year cycle to ascertain if all institutional, program and divisional objectives are successfully achieved.

Faculty are required to incorporate these various objectives into their courses based on their relevance to the course description, assignments, quizzes, and exams. These objectives are connected to all course assignments, quizzes, and exams* to provide outcomes which demonstrate whether the identified objectives are successfully achieved. All assignments are created, submitted and graded electronically, and all quizzes/exams are created, taken, and graded electronically. Each assignment is graded with a rubric which has a section tied to various outcomes. Quizzes and exams are created using question banks and each bank is tied to one or more objectives. This allows the Institution to pull data from the learning management system.

In order to identify student effectiveness in achieving the objectives, there are three measurement levels - "exceeds expectations," "meets expectations," and "does not meet expectations." These marks are not tied to student grades. For the sake of clarity and consistency the faculty have adopted these definitions for distinguishing between the measurements.

1. "Exceeds Expectations" means that the student went "above and beyond" meeting the objective and has fulfilled more than what was expected for the stated objective.
2. "Meets Expectations" means that the student met the requirements by obtaining 70-100% of the allotted points on the rubric for the stated objective.
3. "Does Not Meet Expectations" means that the student did not meet the requirements by obtaining less than 70% of the allotted points on the rubric for the stated objective.

The designation of exceeds expectation is valued at five (5) points, meets expectation at three (3) points and does not meet expectations at zero (0) points. These values are internally set within the learning management system. Because of the very high standard set for exceeds expectation, the Institution has set a numerical value of 2.0 as accepted student effectiveness at meeting an objective.

*Quizzes and exams will be incorporated into outcomes beginning with the Fall 2022 semester.

Associates in Arts in Bible and Theology; Specialized Ministry; and Assemblies of God Credentialing Preparation Objectives, Measurements, and Outcomes

Objective 1: **Communicate a biblical worldview.**

	Spring 2022
Average Score	2.64
Students Enrolled in Classes	27

	Spring 2022
Number of Courses that Measured the Objective	3

Objective 2: **Communicate the gospel in a variety of settings.**

	Spring 2022
Average Score	3.0
Students Enrolled in Classes	17

	Spring 2022
Number of Courses that Measured the Objective	1
